- Developed the UI for properly displaying the products in an organized manner

Shantanu:

- Completed the company portal and admin portal of the project
- Developed the SQL tables associated with storing companies and admin info
- Designed the UI for the company portal and admin portal

**Version Control Tool**

We used GitHub as our main version control tool for this entire project. We regularly pushed and pulled from a single repository that was shared among ourselves. In addition, we held regular Zoom calls and met in-person several times to discuss our progress and fix any challenges.
